PHARMACEUTICAL

A diagram showing a black triangle on a grid. The triangle has a horizontal base of 10 units and a vertical height of 4 units. The area under the triangle is shaded gray, and the area above the triangle is shaded light gray. The triangle is labeled with '10' for the base and '4' for the height.

			2023

A 7x3 grid with a black background. A large black triangle is positioned on the left side, with its base at the bottom-left corner and its apex at the top-right corner of the first column. Two smaller black triangles are positioned on the right side, one in the top-right corner of the second column and one in the bottom-right corner of the second column.

[illegible]

The image shows a 12x12 grid with a gray header and footer. The grid contains three black shapes: a small triangle at (3,1), a small square at (3,7), and a large triangle at (4,11) extending to (7,12).

02

A 10x10 grid with a black triangle in the bottom-left corner. The triangle's vertices are at the bottom-left corner of the grid, the point (10, 1) on the bottom edge, and the point (1, 10) on the left edge. The grid lines are thin and gray. The triangle is solid black.

--	--	--

A 5x5 grid with a large black triangle on the left and a small black triangle in the top right corner. The large triangle has its vertical base on the left edge, spanning from the second row to the fifth row (4 units high), and its horizontal top edge spans from the first column to the third column (2 units wide). The hypotenuse connects the bottom-left corner (5, 1) to the point (3, 3). The small triangle is located in the top-right corner, with its vertices at (5, 5), (4, 5), and (5, 4).[illegible]

[illegible]

The diagram consists of a large black arrow pointing to the right. Below the arrow is a horizontal gray bar. This bar is divided into three segments by two vertical lines. The first segment on the left is a small rectangle. The second segment in the middle is a rectangle that is wider than the first. The third segment on the right is a long rectangle that extends to the right edge of the image.

[illegible]

The diagram illustrates the decomposition of a trapezoid into a triangle and a rectangle. On the left, a black triangle is shown with its base at the bottom and its apex at the top-left corner. To the right of the triangle is a gray rectangle. The total width of the figure represents the sum of the triangle's base and the rectangle's width, which corresponds to the sum of the two parallel bases of the original trapezoid. The height of the triangle and the rectangle is the same, representing the height of the trapezoid.

[illegible]

A diagram showing a right-angled triangle. The vertical side is on the left, and the horizontal side is at the bottom. The hypotenuse connects the top of the vertical side to the right end of the horizontal side. A red dot is located at the vertex where the hypotenuse meets the vertical side.

[illegible]An abstract geometric composition featuring several black and white shapes. In the top left corner, there is a small table with three rows and two columns. The first row has a light gray cell on the left and a white cell on the right. The second and third rows have white cells in both columns. The rest of the image is filled with large, irregular black and white shapes that overlap and create a complex, layered effect. The shapes are defined by sharp, straight lines, creating a sense of depth and movement. The overall composition is minimalist and modern, with a focus on geometric forms and negative space.

[illegible][illegible][illegible]

A decorative graphic consisting of two large black circles positioned on either side of a central grid. The grid is composed of a 2x10 array of squares. The top row of the grid is entirely gray. The bottom row consists of alternating white and gray squares, starting with a white square on the left. The two large black circles are superimposed over the grid, with each circle centered over a pair of columns.

[illegible]

A 10x10 grid of squares. A small black triangle is located in the first row, first column. A larger black triangle is located in the first row, first column.

--	--	--

[illegible]

The diagram consists of two main parts. On the left, there is a solid black triangle pointing to the right. Its base is a vertical line on the far left, and its top edge is horizontal. On the right, there is a long, thin horizontal gray bar. The bar is divided into three segments by two vertical lines. The first segment on the left is slightly wider than the other two. The bar extends to the right edge of the image.
